Okay, I will publish the document page first thing tomorrow morning (7:45-8). Then we can add the public notice as a PDF as soon as you have a date.

But we do want to turn on the other documents tomorrow though.

Craig,

Where is it you want the public notice put on? Do you mean on the document page Tim started?

I've made numerous small cosmetic changes to the public notice to comply with official EPA style. Also, the URL you used in the PN for the document page would not work for the public. I have corrected that to reflect that address the page will have after it is published. Note also, there are three places in the PN that require a date be inserted. Do we have a date to insert, or should

the language be changed to say "30 days after publication of this notice" or something to that effect?

Bill

Bill,

The FR notice will be published tomorrow. So if you can flip the switch tomorrow that would be great. Also attached is the public notice that will be published in the Bismarck Tribune. If you could put that on too it would be great.

Hi Craig and Douglas!

I'm preparing a "document page" that will contain the description of the docs, as well as the docs themselves. I thought about creating a "basic page" (Bill will know what that means), but I think we can "name that tune on one page" by simply creating this document page, which will

probably need several small tweaks. It is not yet live:

<https://wcms.epa.gov/region8/north-dakotas-class-vi-primacy-application>

In case this needs to be published while I am out (the first two weeks of August), let Bill know, and he can “make it so” for you!

Thanks,

Tim

Tim,

Attached is the State of North Dakota’s Class VI primacy application (first in the nation). We are getting prepared to print a notice in the Federal Register, which should be done in the next week or so. Can you prepare this for posting and once it is printed in the Federal Register be able to “turn on the switch”?

Thanks,

Craig Boomgaard, P.G., PMP

To: Boomgaard, Craig; McWhirter, Lisa
Subject: Official Class VI Primacy Application

The attached North Dakota 1422 UIC program application for Class VI primacy enforcement responsibility is officially submitted for USEPA approval. The North Dakota Class VI primacy application includes:

- (1) Letter from the Governor of the State requesting program approval;
- (2) Class VI 1422 UIC program description;
- (3) Attorney General's statement;
- (4) Memorandum of Agreement (MOA) with the Regional Administrator;

In addition to the attached MOA, two original copies of the MOA have been signed by Lynn Helms, Director of the North Dakota Department of Mineral Resources, Oil and Gas Division and mailed to EPA Region 8 for signature by Shaun McGrath, Regional Administrator. Upon signing the MOA, one copy is to be kept by EPA for its records and the second signed copy is to be mailed back to the North Dakota Department of Mineral Resources, Oil and Gas Division. The MOA signed by both parties will replace the MOA in this application.

- (5) Memorandum of Understanding with the North Dakota Department of Health; and
- (6) Copies of all applicable State statutes and regulations.

The North Dakota Class VI primacy application contains all the elements required for State UIC program revision. I respectfully request a timely EPA review and approval of the North Dakota Class VI primacy application.

Sincerely,

Kevin C. Connors
